

Lab 1 (Tkinter)

What's Tkinter

- It's a python's standard **cross-platform** package for creating a graphical user interfaces(GUIs).

How to import tkinter

- In python 2.x :
 - Import Tkinter as tk
- In python 3.x :
 - Import tkinter as tk

Steps for creating your GUI

- 1) Create the main window.
- 2) Create your components (widgets).
- 3) Add & position your components to the main window using geometry managers.
- 4) Start the main loop to keep the window open.

Note

- The rest of the lab is in the code.
